Projects

Kocian Meats -

- Gatsby e-commerce site made for a large, long-standing business in Cleveland.
- Fetched content with graphql from CMS.
- Implemented SCSS to ensure proper nesting.
- Used continuous deployment with Netlify Build hooks.
- All blog content taken from CMS.
- Product modals using statically generated pages.
- Optimized image loading.
- Utilized React Helmet SEO practices.

Vote App

- Anonymously vote about a topic with your friends.
- Utilized Vanilla JavaScript, HTML, CSS.
- DOM manipulation based on user input.

Rick and Morty Search App

- React SPA.
- Utilize fetch method to get data from the Rick and Morty character database API.
- Implemented React styled components for ease of styling without classnames and problems with scope.

10 West Salon

- Static website made from scratch for a small business in the Cleveland area.
- Used HTML, CSS, JavaScript.
- Utilized responsive design techniques to make site easy to navigate on all devices.

Other Projects

- Wall Brawl - a local multiplayer IOS game built with C# and Unity.
- Digital multi FX pedal for use with headless Raspberry Pi 3 and a USB number pad. Built to perform with during a tour around Asia.
